

Protected Habitats

Lakes, Streams, and Rivers (Wetlands)

- Nature's sponges, nurseries, and water filters.
- Defined as a marsh, swamp, or other area of land where the soil near the surface is saturated or covered with water, especially one that forms a habitat for wildlife.
- Wetlands are protected under the Clean Water Act.

Grasslands (Prairies)

- A mix of cold season grasses and flowering plants that create an open, low-grass landscape.
 - Created by retreating glaciers
 - Historically, maintained by Native Americans
 - Unique to the Pacific Northwest
 - Home to several Federally Listed Species
- Grasslands are protected under Army Regulations.

Oak Woodlands and Ponderosa Pine Savannas

- Oak Woodlands – *Quercus garryana*, the Garry oak, Oregon white oak or Oregon oak.
- Ponderosa Pine Savannas – *Pinus ponderosa*, ponderosa pine, bull pine, blackjack pine, or western yellow pine.
- The trees create a landscape mosaic of grassland, savanna, woodland, and closed-canopy forest.
- Woodlands and Savannas are protected under Army Regulations.

Federally Listed Species

Bull Trout, Steelhead, Chinook Salmon

- **Bull Trout** (*Salvelinus confluentus*) are a cold-water fish of relatively pristine stream and lake habitats in western North America. Listed as Threatened.
- **Steelhead salmon** (*Oncorhynchus mykiss*) are commonly known as trout, but in fact they are a species of salmon native to the Pacific region. Listed as Threatened.
- **Chinook salmon** (*Oncorhynchus tshawytscha*) is an important keystone species of the Pacific Northwest. Listed as Threatened

Bald Eagle

- **Bald eagle** (*Haliaeetus leucocephalus*) is evenly dark brown with a white head and tail. The tail is moderately long and slightly wedge-shaped. Delisted due to recovery.
- Protected under the Migratory Bird Treaty Act.

Water howellia

- **Water howellia** (*Howellia aquatilis*) is an annual aquatic plant that grows 4-24 inches high in marshes and wetlands. List as Threatened.

Taylor's checkerspot butterfly

- **Taylor's checkerspot** (*Euphydryas editha taylori*) is a grassland dependent invertebrate. Its entire life-cycle from egg to adult is on local grasslands. Listed as Endangered.

Streaked horned lark

- **Streaked Horned Lark** (*Eremophila alpestris strigata*) is small, ground-dwelling songbird with conspicuous feather tufts, or "horns," on its head. Listed as Threatened.

Mazama pocket gopher

- **Mazama pocket gopher** (*Thomomys mazama*) is a smooth-toothed pocket gopher restricted to the Pacific Northwest. Potential for listing as Threatened.

Joint Base Lewis-McChord Directorate of Public Work Environmental Division

- Responsible for conservation of all Federally Listed Species and rare species.
- Responsible for management of the species habitats.
- Army Regulation 200-1, JBLM Regulation 200-1, and JBLM Regulation 420-5

Training Area 2

Description

- **Area:** 817.89 acres
- **Terrain:** Level ground with extensive wetlands (swamps and bogs) and Sequalitchew Lake.
- **Vegetation:** Douglas fir, alder, madrone, dense undergrowth with some clearings. Mostly forest and coastal forest. **Poison oak/ivy occurs in this area.**

Uses

- **Hunting Methods Authorized:** Archery, Bird Shot, Waterfowl, Non Hunter
- **Nature Trail:** McKay Marsh Nature Trail

Basic Information

- **Wetlands, Rivers, and Lakes:** Stay on roads when within 50 meters of wetlands.

Training Area 3N

Description

- **Area:** 1994.89 acres
- **Terrain:** Generally level terrain with small hills and hollows. Steep bluffs leading into the Nisqually River Basin. Nisqually River floodplain with extensive wetlands (swamps and bogs).
- **Vegetation:** Mostly forested with Douglas fir, alder, and cottonwood with dense undergrowth and some clearings. Wetlands and Nisqually River.

Uses

- **Bald Eagles:** Do not approach or interfere with eagles or their foraging and nesting activities.
- **Fish Hatchery:** Training area 03 South and Trotter Woods (Portion of Training Area 03 North) is off limits.
- **Hunting Methods:** Rifle, Black Powder, Archery, Bird Shot, Waterfowl, Non Hunter

Basic Information

- **Wetlands, Rivers, and Lakes:** Stay on roads when within 50 meters of wetlands.
-

Sources: Esri, USGS, NOAA

Training Area 4

Description

- **Area:** 5858.6 acres
- **Terrain:** Many hills, hollows, and wetlands (swamps). Some ponds. Limited cross-country mobility and few landmarks. Bluff along the south side.
- **Vegetation:** Mostly forested with Douglas fir, alder, madrone, and cottonwood with dense undergrowth and some clearings. Some Oregon white oak. Wetlands. Timber harvest and clear-cuts.

Uses

- **Hunting Method:** Rifle, Black Powder, Archery, Bird Shot, Pheasant AM, Pheasant PM, Waterfowl, Non Hunter

- **Recreational Vehicles:** ORV Park. Parking for ORV area is in Training Area 5.

Basic Information

- **Wetlands, Rivers, and Lakes:** Stay on roads when within 50 meters of wetlands.

Training Area 5

Description

- **Area:** 2426.55 acres
- **Terrain:** Many hills, hollows, and swamps. Some ponds. Limited cross-country mobility and few landmarks. Bluff along the south side.
- **Vegetation:** Forested with Douglas fir, alder, and cottonwood with dense undergrowth and some clearings. Grasslands and Oregon-white oak. Wetlands. Timber harvest and clear-cuts.

Uses

- **Hunting Method:** Rifle, Black Powder, Archery, Bird Shot, Waterfowl, Non Hunter

- **Recreational Vehicles:** Parking for ORV Park.

Basic Information

- **Wetlands, Rivers, and Lakes:** Stay on roads when within 50 meters of wetlands.
-

Sources: Esri, USGS, NOAA

Training Area 6

Description

- **Area:** 2286.91 acres
- **Terrain:** Level grassland and open woodland with ground rising gently to Kicker Hill in south center. Cherry Hill in the north. Muck Creek and associated wetlands (bogs and swamps) in the south.
- **Vegetation:** Forested with Douglas fir, alder, and cottonwood with dense undergrowth and some clearings. Grasslands, Oregon-white oak, and ponderosa pine. Wetlands and Muck Creek. Timber harvest and clear-cuts.

Uses

- **Hunting Method:** Rifle, Black Powder, Archery, Bird Shot, Waterfowl, Non Hunter
- **Sensitive Sites:** Seibert staked areas, Cultural Resource areas, and grassland habitat.
- **Bald Eagles:** Do not approach or interfere with eagles or their foraging and nesting activities.

Basic Information

- **Wetlands, Rivers, and Lakes:** Stay on roads when within 50 meters of wetlands.
