**OPEN ANNOUNCEMENT NUMBERS ON USAJOBS:**

# **SUPERVISORY GENERAL SUPPLY SPECIALIST (AMMO)**

## **GS-2001-11**

### **JOB DESCRIPTION**

- Review customer's past performance to determine if customer should receive ammunition.
- Approve/disapprove the issue of ammunition considering such factors as mixed ammunition, vehicle suitability, accurate documentation, user authorization, usage history of unit, and troop training dates.
- Monitor the turn-in of residue, unserviceable and serviceable ammunition.
- Certify residue is explosive free and determines final destination (DRMO, post recycle/landfill, or appropriate depot).
- Coordinate with the appropriate personnel on unserviceable ammunition to determine if the ammunition can be destroyed on YTC or must be returned to the depot.
- Monitor the progress of quarterly wall-to-wall inventories of the Class V training ammunition and residue; monthly inventories of all Category I missiles and rockets; and any special inventories and location surveys requested.
- Coordinate with warehouse personnel to set up inventory and location survey files; distributes and provides assistance in the inventory process.
- Verify inventory counts as required and performs extensive research to identify and resolve high dollar (approximately \$30 million) item discrepancies related to storage location problems.
- Serve as the functional systems analyst over three automated systems to maintain stock record accountability of ammunition.
- Responsible for the Training Ammunition Management Information System (TAMIS) and the Unique Item Tracking (UIT) system for reporting usage of missiles and rockets.
- Provide technical advice, guidance, and assistance on customer supply operations to agency personnel.
- Manage delinquent documents list and exception to policy requests.
- Supervise civilian and military positions.
- Make and review work assignments providing guidance and assistance on technical and administrative matters.
